

Touring LED Solutions

Large scale, outdoor systems with Brompton processing.

AMT series

A lightweight
and transparent
outdoor touring
solution

Lower Costs & Faster Setup by design

Immersive brilliance meets effortless deployment. The AMT Series offers a striking blend of transparency, durability, and lightweight modularity.

- **Concerts & Touring**
- **Sports & Venues**
- **Festivals & Events**
- **Corporate & Brand**

Why it's better

Safer in Outdoor Conditions

- The open, blow-through design reduces wind resistance — making the screen more stable and safer at festivals, stadiums, and outdoor events.

Brighter, Clearer Impact

- 5,000 nits of brightness with 70% transparency delivers stunning visuals in outdoor, stadiums, or on the road — no matter the conditions.

Lightweight, Cost-Saving Design

- Panels are ultra-light, cutting down on rigging labor, trucking costs, and setup time — perfect for tours and venues with fast turnarounds.

Why Touring Crews Love It:

Less weight. Less time. More wow factor. The AMT delivers world-class visuals without slowing down production.
